VIRTUAL ON™

HOLOGRAPHIC BOOTH AND CUSTOM MADE STAGE

Our team can help you to create any type of presentation based on your ideas and what you would like to give to your audience using the Holographic Stage. Easy to set up, we provide you with all you need to WOW everyone and give them and unforgettable experience. With no need of 3D glasses, you ensure that everyone among the audience will enjoy the hologram technology in your next event, presentations, concerts, conferences, holographic lectures, etc.

BENEFITS

Flexibility
Our new Holographic Projection, or Hologram Screen using a Holographic Net, is a quick and practical alternative where the visitors are not far from the screen, it requires low levels of light but it can even work in exhibition environments.

Cost Effective
We standardise the system in the way that it becomes more and more affordable even for small business, the relation cost effectiveness is the best on the market.

Simplicity
A Live Holographic Projection on a transparent surface carefully setting up light makes the hologram work and the image seems to appear floating free in the air.

Projecting
How to choose or setup the projector, Holographic Booth/Stage to achieve the type of effect that will amaze your audience is part of our technical expertise and years of experience.
