CUSTOM MADE VIRTUAL MANNEQUINS

The virtual mannequin from Virtual On creates a “holographic model” that enables the store or the brand to effectively and consistently communicate messages that are powerful, promotional, or informational. The hologram uses pre-prepared videos that could feature any person, giving a unique and distinctive touch to the way you promote your products or services. Virtual Mannequin is all about garnering instant attention.

BENEFITS

- The audience is served with the most innovative way of delivering promotional or informational message.
- The digital solution is fully customisable, which could fit any kind of brand and product for messaging.
- You get guaranteed message consistency.
- The information is expressed in the same way as you want it to be.
- Connects with your audience to provide an entertaining and engaging experience, delivering a consistent and clear message.
- The virtual mannequin could be multi-lingual.
- Has been very effective in increasing sales for several brands.
